EDUCATION

- **Universidade de São Paulo** São Carlos, SP
Bachelor of Information Systems; GPA: 3.8 (7.5/10.0) Jan. 2023 – Dec. 2027

Covering core foundations of computing including hardware, system architecture, and software design patterns, along with entrepreneurship and the application of technology in business contexts.

EXPERIENCE

- **Shopee** São Paulo, SP
Software Engineering Jr. dez - 2023 - Present
 - **Sponsor:** Marketplace incentive platform for brands and sellers to invest in product visibility campaigns within the marketplace. Worked on scalable backend services, integrations, and analytical dashboards in a high-complexity distributed architecture.
Stack: Golang, Keycloak, RabbitMQ, PostgreSQL, Docker
 - **Shopee Notas:** High-availability NF-e issuance system designed for high-volume processing, handling an average of 3 million requests per day. Acted as one of the main developers, contributing to the system architecture, performance optimization, and scalability of distributed services.
Stack: Golang, RabbitMQ, Redis, PostgreSQL, Docker, gRPC, Grafana, Argo Workflows
 - **BacenJud:** Judicial integration system responsible for blocking and unblocking seller accounts and financial assets within legal workflows. Worked on the development and maintenance of reliable and traceable services, with a strong focus on process observability and system stability.
Stack: Golang, RabbitMQ, PostgreSQL, Grafana.
 - **CT-e:** Legacy system rewrite from Python to Golang for the issuance of CT-e (Electronic Transport Knowledge). Contributed throughout the entire project lifecycle, from technical design to production deployment, achieving significant improvements in performance and efficiency while supporting an average of 5 million daily requests in a business-critical system.
Stack: Golang, RabbitMQ, PostgreSQL, Grafana.
- **Shopee** São Paulo, SP
Junior Developer Jan 2023 - Dec 2023
 - **Counterfeit:** Counterfeit detection system for marketplace products, using NLP and custom matching algorithms to identify fake listings with approximately 90
Stack: Python, C, FastAPI, PostgreSQL.
 - **shopeeScraping:** Web scraping and product intelligence system for product discovery, commercial planning, and competitive analysis. Developed data collection and matching pipelines to extract, cross-reference, and analyze marketplace product information using NLP techniques.
Stack: Python, PostgreSQL, Selenium, C.

CERTIFICATES

- **Certified Business Modeling (4EM):** Enterprise modeling methodology focused on aligning business processes, stakeholder needs, and system requirements using SSM principles.
University of São Paulo (USP) — 2025
- **Flexible Systems Modeling (SSM):** Problem analysis methodology focused on understanding organizational context, stakeholder perspectives, and business constraints to support more effective system planning and decision-making.
University of São Paulo (USP) — 2025
- **English:** Advanced

PROGRAMMING SKILLS

- **Languages:** Java, Python, C, Golang **Technologies:** React, gRPC, Docker, Kubernetes, Redis, RabbitMQ
